PRESENTATION

As Barcelona becomes the **World Capital of Architecture in 2026**, Poble Espanyol invites you to enjoy a unique educational experience during the 2025–2026 school year in a setting **where architecture, tradition, and creativity come together**.

Located in Montjuïc, the green heart of Barcelona, Poble Espanyol was built in 1929 for the International Exhibition as a showcase of Spain's rich architectural and cultural diversity. Today, it stands as a **must-visit destination** that reflects the most **authentic and artisanal side of the city**.

In this special year for Barcelona, Poble Espanyol becomes a key cultural hub where **architectural heritage** merges with **living craft traditions**: over 20 artisan workshops operate daily, demonstrating trades such as ceramics, leatherworking, glassmaking, and jewelry. This offers students a direct connection with Spain's cultural heritage.

Taking part in one of our activities means diving into **local cuisine** by becoming a chef of traditional recipes, developing **creativity** through art and crafts, and experiencing our **customs and traditions** firsthand. All of this turns the visit into a rich and well-rounded learning experience.

And as always, you can count on our professional team to make your visit to Poble Espanyol exactly what you need... or even more!

Then it's time to get hands-on: each student will **design their own leather keychain** and learn the **technique of hand engraving**. Using a mallet and punches, they will carefully stamp letters, numbers, or meaningful words—like “Barcelona” or their own name!

This is a creative, practical, and unique experience that becomes a lasting memory of your time in Spain.

Have you explored Barcelona? Surely, modernist architecture has captured your heart, with icons like **La Pedrera**, **Casa Batlló**, and the **Palau de la Música Catalana**, showcasing the richness of this artistic movement. In the city, mosaics are one of the most representative techniques, used both in ceramics and glass, as seen in the Palau Güell.

In this workshop, you will **learn the glass mosaic technique** by **creating your own coaster**. You will have complete freedom to design your piece however you like—whether with geometric shapes, drawings, or any pattern that inspires you.

A unique artistic experience to connect with Modernism—and to take home a personalized memory of Barcelona!

DECORATE A CERAMIC PIECE

Ceramics are one of the most typical materials in Spain. Just a stroll through our streets reveals colorful tiles decorating façades, patios, and plazas.

In this workshop, you will discover the craft from within, at the Cal Terrissaire space. We will start with a **live demonstration**: our ceramic artists will present their work, show how the pottery wheel operates, and explain the complete process of creating a clay piece.

Then comes the hands-on part: each student will **choose a ceramic piece and paint it using the dry brush technique**—a creative way to layer colors and textures that results in a special relief effect.

Perfect for awakening creativity and taking home a handmade souvenir.

DESIGN A PENDANT WITH FIRED ENAMEL

Jewelry is one of the most deeply rooted crafts in Barcelona, ranging from traditional designs to more modern artistic expressions.

In this workshop, you will discover this fascinating world by designing a unique pendant using the fired enamel technique. This artisanal process involves **applying powdered glass onto metal**—such as copper, silver, or gold—and bringing the piece to life with personalized colors, shapes, and textures.

Once the design is complete, it is **fired at a high temperature**, causing the glass to melt and fuse with the metal, resulting in a shiny, durable, and completely personalized piece of jewelry.

A creative, enriching, and unique experience—perfect for taking home an original souvenir from Barcelona.

In this workshop, you will unleash the artist within and **create your own painted glass piece**. Each student will be **free to design** their own drawing, which will then be transferred onto a glass panel. **Using special paints, you can combine colors and play with the different luminosities and textures of the glass**, creating a personal and vibrant artwork.

At the end of the workshop, you will have the opportunity to visit the Fran Daurel Museum's collection of glass sculptures and pieces, where you can discover works made with techniques such as blown glass and fusing.
